

February 2, 2017

The Honorable Ajit Pai, Chairman
Federal Communications Commission
445 12th Street S.W.
Washington, DC 20554

Dear Chairman Pai,

As you begin your tenure as Chairman of the Federal Communications Commission (FCC), we urge your continued focus on ensuring access to mobile broadband services in rural America and closing the digital divide as a top priority for the Commission.

We appreciate your keen understanding of the benefits that mobile broadband brings to rural America, allowing “anyone, anywhere [to] innovate and succeed.” Reliable high-speed mobile broadband is critical to advancing telehealth services, precision agriculture, economic opportunities, education, public safety, and an ever growing list of new innovations and applications. It is necessary for our constituents, living in some of the most remote and rural areas, to participate in today’s digital economy.

We support your efforts to close the digital divide for low-income and rural Americans. Going forward, these efforts must include removing barriers to broadband deployment and promoting innovation, as well as adopting a Universal Service Fund (USF) Mobility Fund Phase II (MFII).

As you move forward with MFII, we ask that your efforts help to incent wireless carriers to preserve, upgrade, and expand mobile broadband in rural America, rather than degrade and reduce competition in areas that need it most. Competing in a capital-intensive environment, wireless carriers need long-term certainty of ongoing support to invest, deploy, maintain, and update their networks that provide vital mobile broadband services in rural areas. As the best example, certainty should come in the form of sufficient and predictable USF support in both the implementation of MFII and the transition away from legacy support mechanisms over the next several years.

Under your leadership, we urge the Commission to meet its statutory directive and ensure that the latest mobile broadband services are available across the nation, especially in rural America, and we thank you for your attention to this critically important issue.

Sincerely,

ROGER F. WICKER

FEDERAL COMMUNICATIONS COMMISSION
WASHINGTON

OFFICE OF
THE CHAIRMAN

February 21, 2017

The Honorable Tammy Baldwin
United States Senate
717 Hart Senate Office Building
Washington, D.C. 20510

Dear Senator Baldwin:

Thank you for your letter regarding the need for the Commission to move forward with Mobility Fund Phase II. As your letter makes clear, we share the same goal of ensuring the Commission meets the important promise set forth in the very first sentence of the Communications Act of 1934: To “make available, so far as possible, to all the people of the United States, without discrimination on the basis of race, color, religion, national origin, or sex, a rapid, efficient, Nation-wide, and world-wide wire and radio communication service.” I and the hard-working staff at the FCC take this promise seriously.

Closing the digital divide is my top priority, and that’s why I have scheduled a vote on the second phase of the Mobility Fund for the agency’s February meeting. The Mobility Fund will preserve and advance mobile broadband service in rural America so that rural families and farmers, miners and ranchers, small businesses and growing towns have the opportunity to use the high-speed mobile services taken for granted in urban areas. The Mobility Fund is a long-term investment directing almost five billion dollars to rural America over the next decade. And it is designed to maximize value for taxpayers, using a competitive reverse auction to redirect universal service funding away from already-built areas and toward new 4G LTE services for the millions of rural Americans lacking them today.

Your views are very important and a copy of your letter will be included in the record of the proceeding. Please let me know if I can be of any further assistance.

Sincerely,

Ajit V. Pai

P.S. Senator, glad to see you've joined the Commerce Committee! I look forward to working with you. Do let me know if I can help on issues of interest to Wisconsin.

FEDERAL COMMUNICATIONS COMMISSION

As your letter makes clear, we share the same goal of ensuring the Commission meets the important promise set forth in the very first sentence of the Communications Act of 1934: To “make available, so far as possible, to all the people of the United States, without discrimination on the basis of race, color, religion, national origin, or sex, a rapid, efficient, Nation-wide, and world-wide wire and radio communication service.” I and the hard-working staff at the FCC take this promise seriously.

Closing the digital divide is my top priority, and that’s why I have scheduled a vote on the second phase of the Mobility Fund for the agency’s February meeting. The Mobility Fund will preserve and advance mobile broadband service in rural America so that rural families and farmers, miners and ranchers, small businesses and growing towns have the opportunity to use the high-speed mobile services taken for granted in urban areas. The Mobility Fund is a long-term investment directing almost five billion dollars to rural America over the next decade. And it is designed to maximize value for taxpayers, using a competitive reverse auction to redirect universal service funding away from already-built areas and toward new 4G LTE services for the millions of rural Americans lacking them today.

Your views are very important and a copy of your letter will be included in the record of the proceeding. Please let me know if I can be of any further assistance.

Sincerely,

A handwritten signature in black ink that reads "Ajit V. Pai".
